EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph A. Breau on 17 November 2003.

The application has been amended as follows:

IN THE SPECIFICATION:

Page 1, line 1 (before "Technical Field"), insert the following

-- This application claims benefit of U.S. provisional application no. 60/263,584, filed January 22, 2001. --.

IN THE CLAIMS:

Delete claim 1 and add the following new claim 2.

Claim 2. (new) An all-in-one fitting brush comprising:

handle having a rotatable end fitting;

a shank having first and second ends, the shank further comprising first and second end portions which are generally parallel to one another and which are connected by a middle offset portion, the first end of the shank being coupled to the rotatable end fitting thereof such that the shank is rotatable with respect to the handle, the second end of the shank including a socket portion adapted to receive a shaft of a cleaning item; and

a plurality of cleaning items, each of the cleaning items including a shaft adapted to be detachably received in the socket portion of the shank, the plurality of cleaning items including:

a first brush;

a second brush; and

a cleaning item adapted to hold a sheet such as sandpaper.

2. Page 1 was amended to include a reference to the provisional application and claim 1 was rewritten as new claim 2 to better define the cooperation between the recited elements.

3. COMMENT RE DRAWINGS:

Applicant provided two versions of figure 1. One included descriptive text and the other did not. Upon the filing of formal drawings, the new fig 1 should NOT include such descriptive matter.

4. The following is an examiner's statement of **reasons for allowance**: The cited patents all disclose brush member having a handle coupled to a "dog legged shaped shank", with the patent to Petre being most pertinent; however, this patent fails to teach the plurality of different cleaning items including shafts received in the "socket portion" of the shank. In fact, the structure of Petre would not work in the same manner if the cleaning elements were to include a shank for receipt in a "socket portion" in that brush of fig 3 could not be reversed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
